

Simpana® Express Grows With Your Business

HIGHLIGHTS

Simpana Express is unique backup software that grows with your business.

1. Peace of mind

Backed by CommVault's 24/7 industry-leading 96% customer satisfaction rating for customer support.*

2. Simple

Simpana Express is simple to download, simple to install, and simple to order, saving you valuable time and resources.

3. No compromises

Supports all major Microsoft applications, deduplication, and virtualization, including support for both physical and virtual environments.

4. Fully Upgradeable

Upgradeable to the Simpana Enterprise version without having to completely replace your existing data protection solution, providing investment protection.

5. Risk Free

Try it for free for 30 days, including free support during trial period.

The Intuitive, Scalable Solution

Protecting your data is a no brainer, but not everyone is an IT expert or has the time to become one. What you need is a reliable, intuitive, and scalable solution that not only addresses your backup and recovery needs today, but can also grow with your business. Designed for businesses with fewer than 100 employees or up to 5TBs of data to protect, Simpana® Express supports the key Microsoft applications with features such as deduplication and virtualization that your business demands, while being simple to download, install, and purchase.

And where other solutions require you to replace your backup solution once you reach a certain size – effectively penalizing you for being successful – Simpana Express allows you to seamlessly upgrade to our enterprise version without touching your data. All while being backed by our industry-leading technical support. Still not convinced? Try it for free for 30 days, including free support during the trial period.

Priced for Your Budget

Enterprise-class support and data protection are great, but if the solution is too expensive, then it's a non-starter. Simpana Express is priced with small and medium-sized businesses in mind and uses capacity-based pricing to help simplify the decision process. Please contact your CDW SMB sales representative for specific pricing.

Peace of Mind from 24/7 Support

Protecting and restoring your data is critical to the viability of your company. And while nobody plans on problems, when they happen, you want the peace of mind that comes from knowing that you can get in touch with capable and competent support personnel – at any time of the day or night – to resolve your issues. Simpana Express is backed by CommVault's 24/7 support organization that achieved a 96% customer satisfaction rating in a recent benchmark for excellence in customer support.*

Simplicity that Customers Demand

Many organizations don't have a dedicated IT expert and given the priorities of the business and limited resources, may not be able to hire one. Therefore, IT solutions must be simple to install and simple to purchase to save you valuable time and resources. Simpana Express has been designed with simplicity in mind.

- *Simple to download.* The small installer takes less than one minute to download allowing you to be up and running before you know it.
- *Simple to install.* Simpana Express has a wizard-driven installation process to simplify and speed up the installation process. Most of the decisions have been made for you.
- *Simple to purchase.* Fast download and installation times are great, but if the product has a myriad of confusing agents and options to buy, then you still haven't solved any problems. Simpana Express only has three primary options: a 2TB and 5TB base option, and a 1TB upgrade option that allows you to scale

from 2TBs up to 5TBs. All three options come pre-bundled with 1 year of 24/7 support. As a bonus, two free online training courses are included to help you better understand the Simpana architecture and configuration options.

No Compromises on Features or Functionality

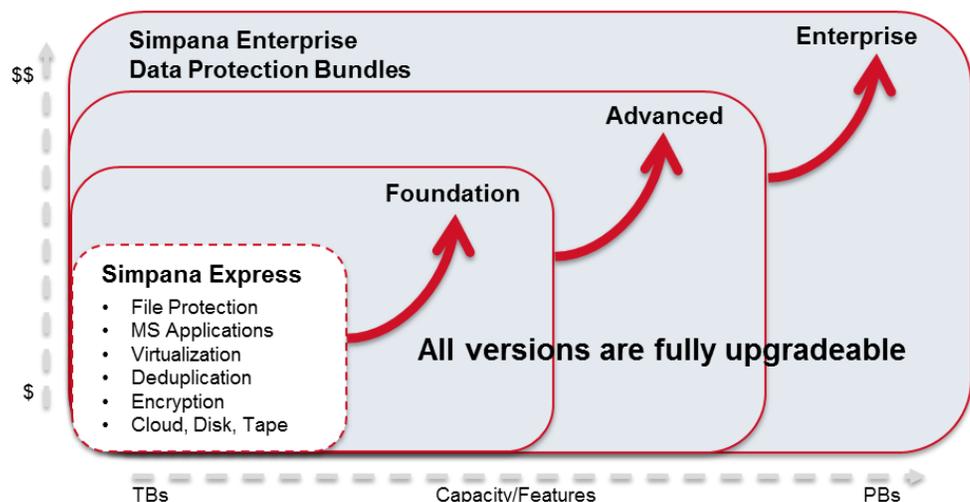

None of the above benefits matter if the only way to achieve them is by sacrificing key features and functionality. Simpana Express addresses customer requirements and the key features include the following:

- *File protection*, including Windows and Linux file systems (local File System, CIFS, NFS, Clusters)
- *Support for the key Microsoft applications* – Active Directory, MSSQL Server, Exchange, and SharePoint – as well as support for MySQL.
- *Deduplication* to help customers eliminate redundant data and reduce storage costs.
- *Virtualization protection*, including support for both physical and virtual environments, which includes support for both VMware and Microsoft Hyper-V environments.

Fully Upgradeable to Simpana Enterprise Version

As your company continues to grow, so does your data. Companies of all sizes are confronted with the challenge of trying to protect and manage this ever expanding data. The question is, will your data protection solution grow with you? Many competitive solutions don't scale well and require you to deploy multiple instances, creating islands of data to manage. Or you have to change from one product to another once you reach a certain size. This is a painful, stressful, and expensive endeavor that forces you to completely replace your existing data protection solution with a new solution, losing your protected data and entire data protection history in the process. In essence, you are being penalized for growing your business.

One of the truly unique value propositions of Simpana Express is that it allows you to seamlessly upgrade to Simpana software's innovative enterprise version without impacting your protected data, your protection history, or your configuration. Simply upgrade your database and capacity-based licensing, and you are ready to go.

Simpana software has enabled CommVault to be positioned as a leader by top industry analysts, including being recognized as a Leader for the third year in a row in the 2013 Gartner Magic Quadrant for Enterprise Backup/Recovery Software; and The Forrester Wave: Enterprise Backup and Recovery Software, Q2 2013. The Simpana solution's enterprise reputation, support capabilities, and upgradeability not only provide peace of mind, but also investment protection.

Risk Free Trial

Still not convinced? Try Simpana Express free for 30 days, including free configuration and technical support during the trial period. What have you got to lose? Simply go to the Simpana Express web site located at www.commvault.com/simpana-express and download the software to get started.

KEY CAPABILITIES AND BENEFITS

File Protection	Protects Windows and Linux file systems (25 agents max), including local file systems, CIFS, NFS, and Clusters.
Virtualization Protection	Protects both physical and virtual server environments (up to 75 unique virtual machines), including support for VMware and Microsoft Hyper-V.
Application and Agent Support	Supports all major Microsoft applications, including Active Directory, MSSQL Server, Exchange, and SharePoint. Also supports MySQL and includes support for up to 5 agents.
Deduplication	Supports deduplication, which eliminates duplicate copies of data, to optimize storage utilization and reduce storage costs (up to 20TB deduplicated storage pool).
Encryption	Allows for client side encryption for all of your protected data.
Storage Options	Supports numerous disk vendors and heterogeneous cloud storage providers, as well as unlimited tape drives.
Try and Buy	Try the product free for 30 days risk free, including free configuration and technical support during the 30-day trial. Download the software at the following URL: www.commvault.com/simpana-express
Simple Options	Simpana Express is available in three simple options: 2TB and 5TB front end capacity base offerings, and a 1TB upgrade offering that allows you to scale from 2TBs to 5TBs. This eliminates the complexity and confusion that comes from numerous agents and options configurations.
Support	Each offering outlined above comes standard with one year of CommVault's 24/7 industry-leading 96% customer satisfaction rating for customer support.
Fully Upgradeable	Simpana Express can be seamlessly upgraded to the enterprise version of Simpana software. Simply update the database and licensing and you're ready to go, without having to completely replace your existing data protection solution or losing your protected data.
